Fining Ale.

---

*(This Invention received Provisional Protection only.)*

PROVISIONAL SPECIFICATION left by James Valters at the Office of the Commissioners of Patents, with his Petition, on the 24th August 1869.

I, JAMES VALTERS, of Great Dunmow, in the County of Essex, Gentleman, do hereby declare the nature of the said Invention for "AN IMPROVED AGENT FOR FINING AND CLARIFYING ALE AND OTHER FERMENTED LIQUORS," to be as follows:—

My agent is manufactured by steeping isinglass in sulphuric acid and water. I then agitate the mixture, adding more water when needful.  
10 When the isinglass is dissolved I add lime to effect the neutralization of the acid to the required degree. The composition is then strained and a small quantity of hop essence or hop pollen is added.
